Despite promises from both industry and the government, reliable information and real assistance for distressed mortgage holders is virtually impossible to get. Your neighbors—people with expertise in related subjects and homeowners who have been through the heart-wrenching trauma of trying to find answers—are taking matters into their own hands...

Did you know... One of four programs available REQUIRE you to be collecting unemployment in order to qualify? ...That there is a program available for mortgage reinstatement? ...A program available to do principle reduction? ...Transition assistance (*money for relocation*)?

Join us! For a series of practical, hands-on, no-holds-barred meetings to ask your questions, find real answers, identify reliable resources, and produce a personal plan for recovery. All at no charge and no obligation whatsoever.

You'll get: realistic, accurate information on Loan Modifications; the pros and cons of Short Sales; Legal parameters around foreclosures; How to communicate effectively with Lenders; and most importantly, your chance to share your story and get your specific questions addressed.
